# Evaluation for _____ 9/25

Communication Assessment

Overall, you increased in confidence because you're speaking significantly more sentences per minute which shows a higher comfort level in speaking. Pronunciation mistakes dropped by about 50% which is excellent. Grammar mistakes increased a bit, though that is also reflective of speaking more. Overall, your communication improved by about 1.78 on a 6 point scale which is very good.

Pronunciation

Last time 42, this time 24

Question 4: 4
Question 5: 5
Question 6: 4
Question 7: 3
Question 8: 4
Question 9: 10
Question 10: 11
Question 11: 4
Question 12: 7

Future Goals

Your Input: We should finish pronunciation and continue to improve communication.

Erica's recommendations: We finish pronunciation and at the same time work more on intonation or the rhythm of speech in the sentence. On this evaluation, we didn't work on that very much because we needed to increase your number of sentences first. Improving intonation also improves confidence, so it will be a good focus for next time. Additionally, we need to practice speaking with good grammar to make sure your grammar level does not decrease as you speak more. There are two techniques we can use. We can do intonation modeling which I'll show you, and we can also answer questions that target grammar points specifically.
